

independence

ProMaster

ARBOC's Independence with a kneeling suspension is built on the trusted ProMaster 3500 cutaway chassis. Operators will appreciate its fuel efficiency, as well as the low maintenance involved. The bus is equipped with large passenger windows, offering considerable visibility, and is designed with a 1:5 ramp slope and a fully flat floor giving riders the accessibility that is expected from the nation's leading low floor mobility bus manufacturer.

23', 7 Passenger, 5 w/c

Standard Features

Specifications
